IDENTIFIERS Apple IIe; *AppleWorks

ABSTRACT

This step-by-step guide to constructing word processing files using the AppleWorks software on the Apple IIe computer covers (1) loading the program; (2) adding files to the desktop; (3) selecting the word processor option; (4) naming the file; (5) setting tabs; (6) selecting print options; and (7) saving the file. Sixteen sample screen displays are included to illustrate the steps. (MES)

INTRODUCTION

"Constructing AppleWorks Word Processing Files For The Apple IIe Computer" was developed for use as a "how to" training device. It can be used with Apple IIe computers which have a Duodisk or two disk drives. Its development was accomplished using an Apple Duodisk drive, 5 1/4" floppy disks, and the 1.3 Version of the AppleWorks program. The pictures one sees in the Figures are those that will be seen when V1.3 of the AppleWorks program is used for the formatting process. Generally, other versions of the AppleWorks program (V1.2 for example), as well as the smaller disk drives presently available on the market, may be used in conjunction with the document. If the document is to be used as it was intended at the time of development, users must have the following items available to them:

1. Apple IIe computer.

2. A Duodisk or two disk drives.

3. AppleWorks startup and AppleWorks program disks. These programs may be located on opposite sides of the same computer disk.

4. One data disk.

The following skills must be mastered by users before the document can be used as it was intended. Users must be able to:

1. Turn on the Apple computer.

2. Bootup the AppleWorks program.

After using this document, Apple IIe computer operators should be able to construct word processing files for the Apple IIe computer using V1.3 of the AppleWorks program. Additional guidance in this regard may be found in the AppleWorks program manual which accompanies the purchase of the program. Manuals are also available from many bookstores.

Mistakes found in this document are mine.

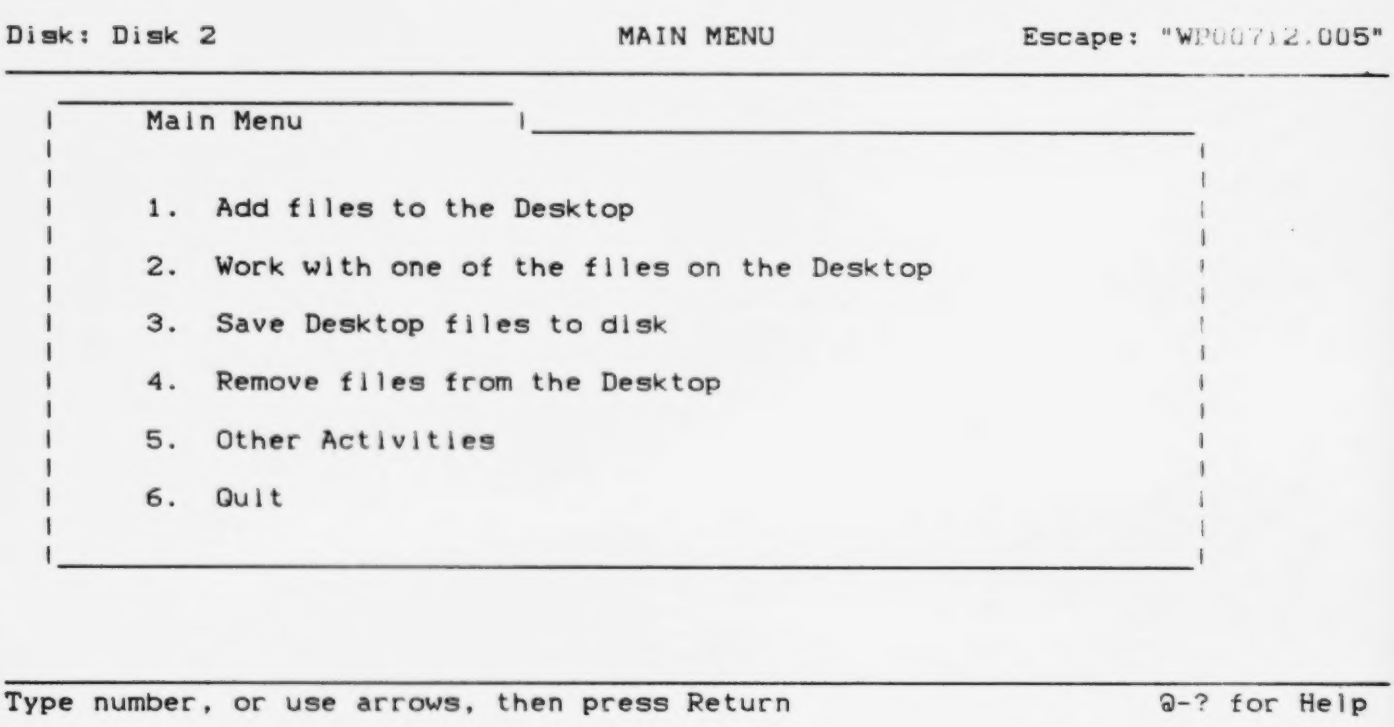
DIRECTIONS

01. Program Loading. Place the AppleWorks program (Version 1.3) in slot #1 of the Duodisk drive or drive #1 if two seperate drives are used and load the program into the computer. This step may require using two disks, one the startup disk and one the program disk or turning the startup disk over if the startup and program portions are on opposite sides of the same disk. With this task completed, your computer monitor screen should look like Figure 1 (the "Main Menu" is on the screen). In the upper left corner of the screen, you should find the numeral "2" following the second word "Disk." If this is the case, proceed to step 02. If the numeral is "1" in the upper left hand corner, you should skip steps 02 and 03, proceeding directly to step number 04.



Disk: Disk 2
MAIN MENU
Escape: "WP00712.005"
Main Menu
1. Add files to the Desktop
2. Work with one of the files on the Desktop
3. Save Desktop files to disk
4. Remove files from the Desktop
5. Other Activities
6. Quit
Type number, or use arrows, then press Return
@-? for Help

Figure 1. The Computer Screen With Disk Drive Two Selected.

02. Selecting The Add Files To The Desktop Option. Select option #2, "Add Files to the desktop" option from the "Main Menu." This is accomplished as follows:

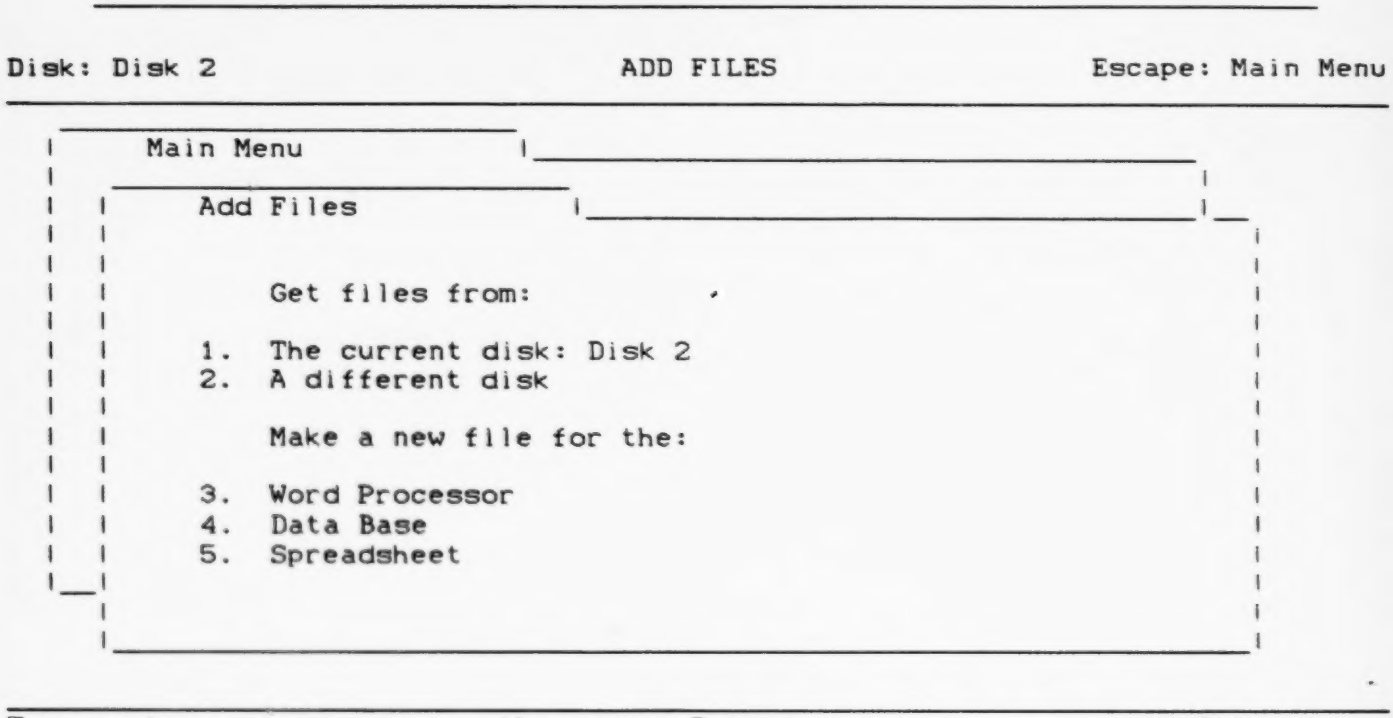


Figure 2. The Screen After Selecting, the "Add files to the desktop" Option From The "Main Menu."

a. Press the NUMBER-2 key once.

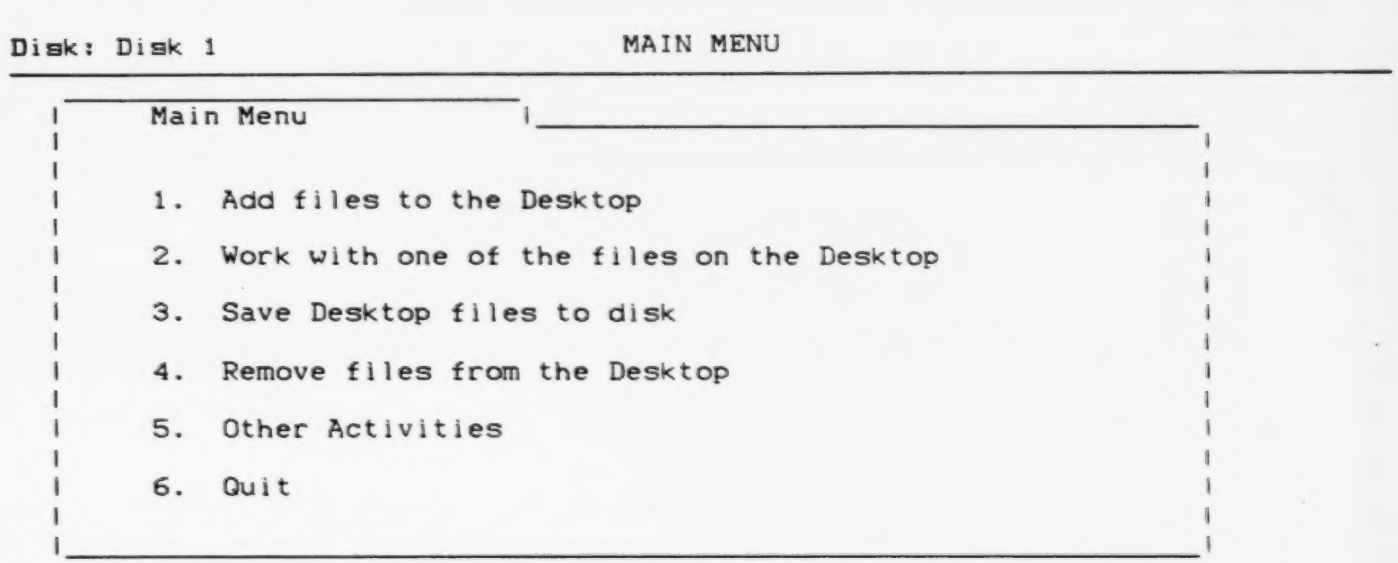
b. Press the RETURN key once. Following this action, your screen should look like the picture shown in Figure 2.

03. Jumping To Step 08. If you have successfully reached this point, jump to step 08.

04. Disk #1 Selected. If the screen looks like the picture shown in Figure 3 (note the #1 in the upper left corner of the Figure), select the "Add Files" menu as was done above in step 02 and then proceed to step #5.

05. Selecting A Different Disk. Select option #2, "A different disk" from the "Add Files" menu as follows:

a. Press the DOWN-ARROW key once.



Disk: Disk 1
MAIN MENU
Main Menu
1. Add files to the Desktop
2. Work with one of the files on the Desktop
3. Save Desktop files to disk
4. Remove files from the Desktop
5. Other Activities
6. Quit
Type number, or use arrows, then press Return
?-? for Help

Figure 3. Computer Main Menu Screen With "Disk: Disk 1" Selected.

b. Press the RETURN key once. The monitor screen should look like the picture shown in Figure 4.

06. Selecting Disk 2. Select option 2, "Disk 2" as follows:

a. Press the DOWN-ARROW key once.

b. Press the RETURN key once. The screen should have changed following this action so that it appears as it did in Figure 2. The numeral "1" in the upper left corner of the screen

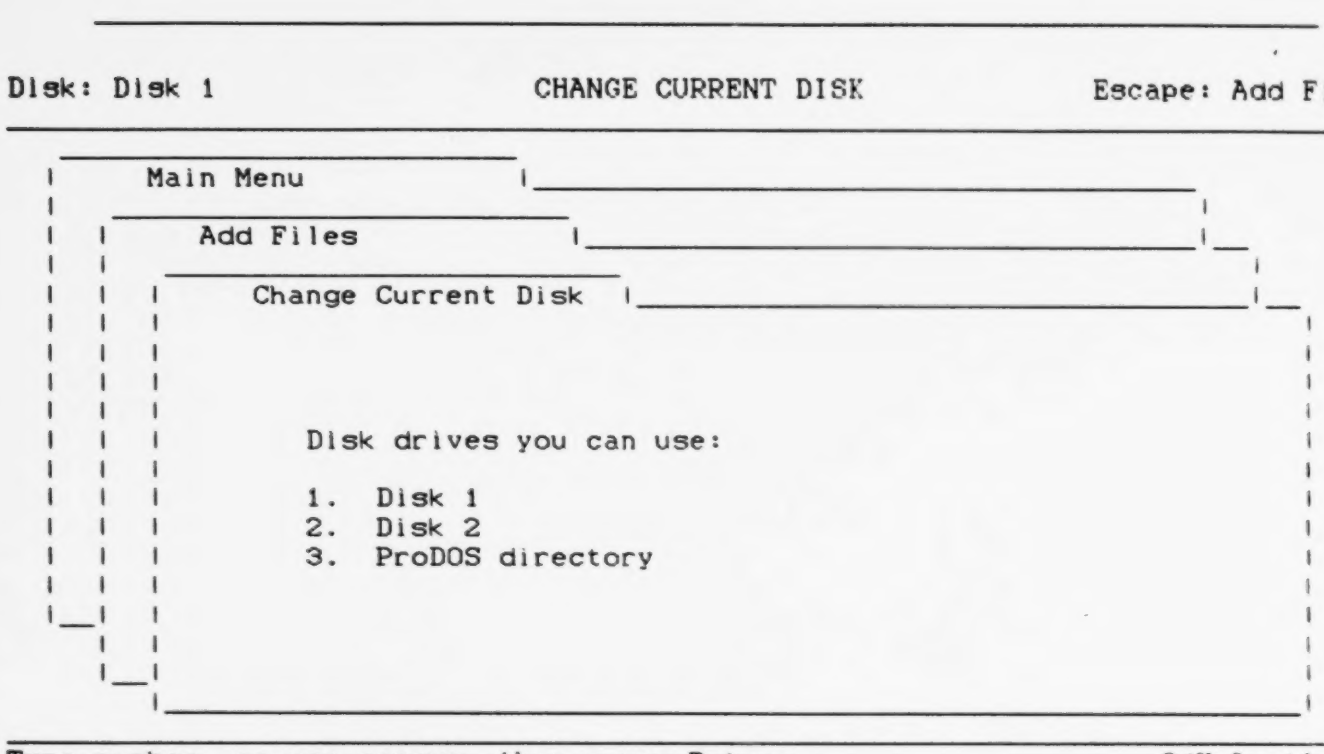


Figure 4. The Monitor Screen After Selecting The "A different disk" Option.

07. Continue To Step 08.

08. Selecting the Word Processor Option.

a. Press the numeral "3" key once.

b. Press the RETURN key once. The combined actions of procedures "a" and "b" will bring you to the "Word Processor" menu and the screen will appear as does the picture in Figure 5.

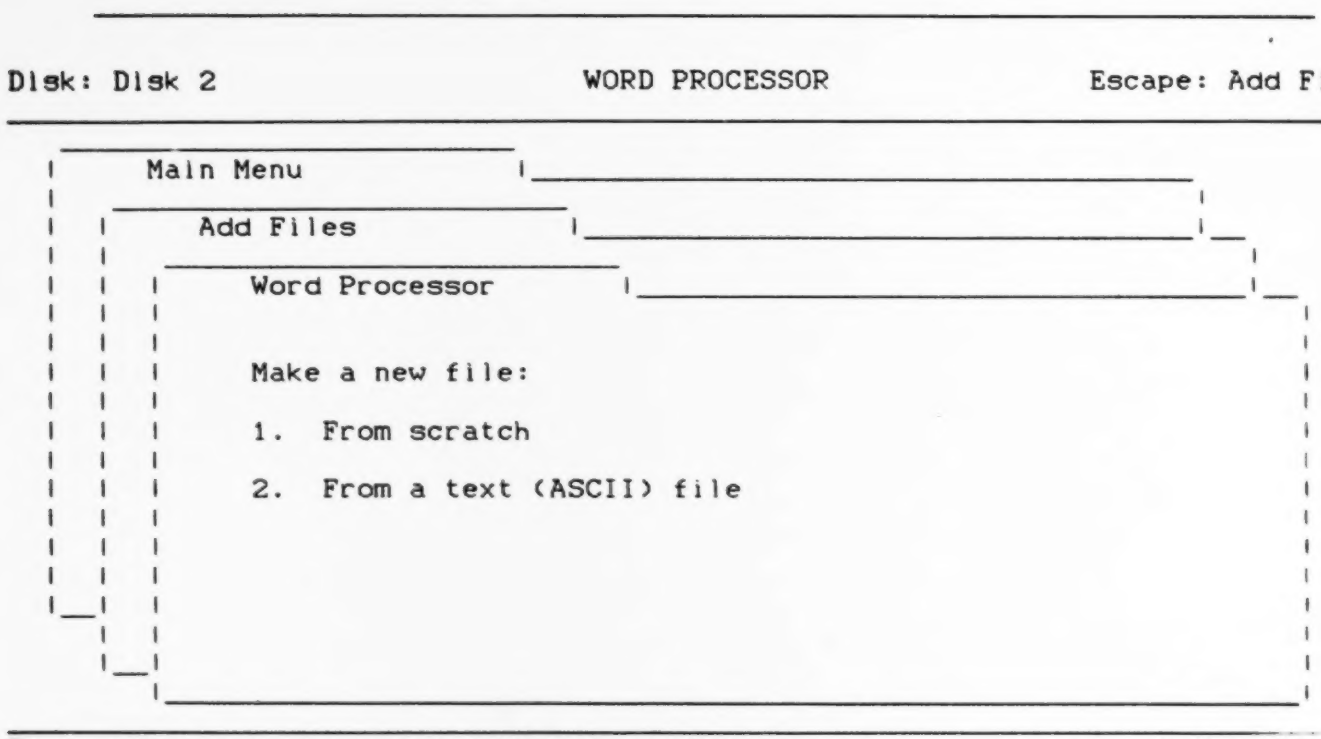

Figure 5. The "Word Processor" Menu.

09. Naming The File.

a. Select option #1 (it is high lighted), "From scratch" by pressing the RETURN key once. The picture you see on the screen will change so that it looks like the one shown in Figure 6.

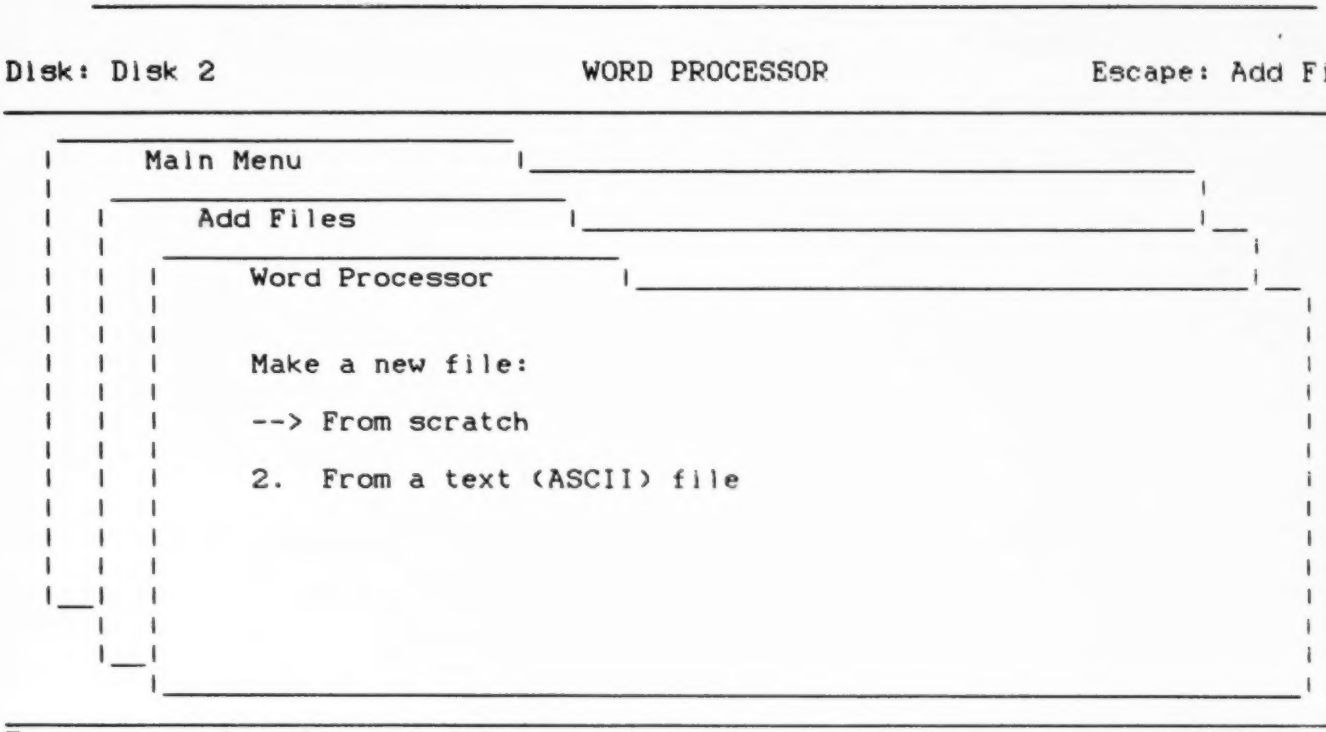

Figure 6. The Screen Showing The "From Scratch" Option Of The "Word Processor" Menu Selected.

b. Directions at the bottom of the screen tell you to name the the new file so type the word "LETTER." The screen now is identical to the picture of the screen shown in Figure 7.

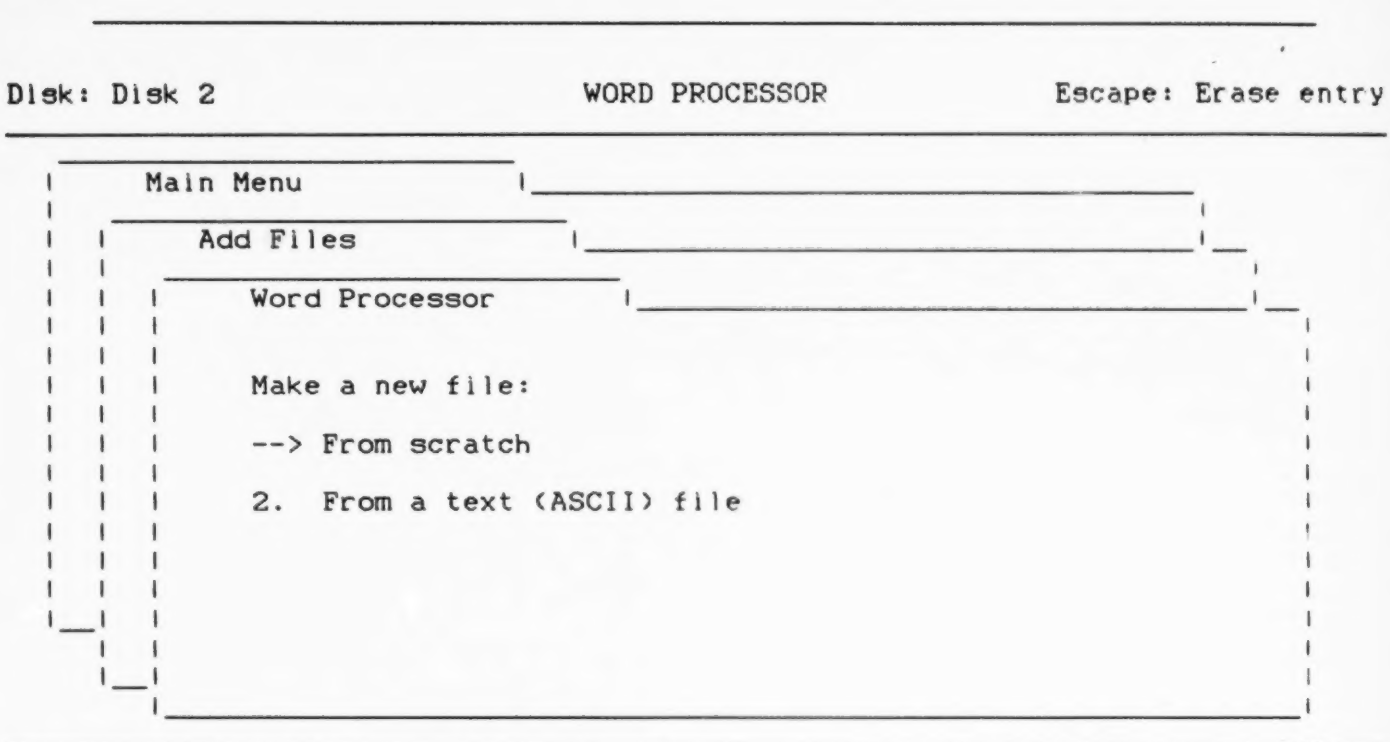

Figure 7. Blank Word Processor File Titled "LETTER."

c. Press the RETURN key once to enter the file title. The screen should look like the picture shown in Figure 8.

```
File: LETTER                    REVIEW/ADD/CHANGE                Escape: Main Menu
=====|====|====|====|====|====|====|====|====|====|====|====|====|====|====|===

-------------------------------------------------------------------------------
Type entry or use @ commands                Line 1  Column  1        @-? for Help
```

Figure 8. The Computer Screen Showing The Showing The Word Processor File After Entering The Title, "LETTER."

10. Setting Tabs.

    a. Press the OPEN-APPLE and the "T" (tab) keys at the same time to enter the tab setting and removing function. The computer monitor screen will be identical to the example shown in Figure 9.

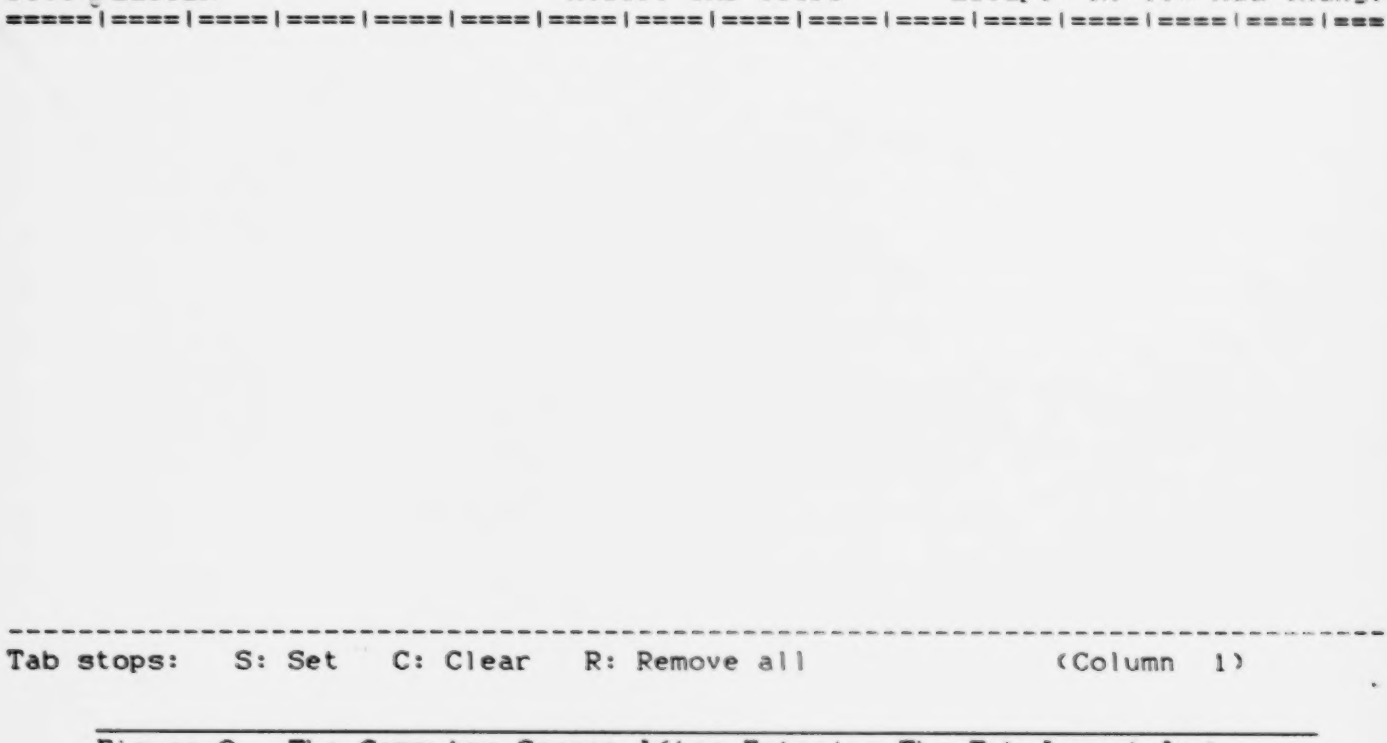

Figure 9. The Computer Screen After Entering The Tab Insert And Delete Function.

b. Press the "R" key once. Note that all of the tab set lines (vertical lines at the top of the screen) disappeared (see Figure 10).

```
LETTER                    MODIFY TAB STOPS      Escape: Review/Add/Change
================================================================================

--------------------------------------------------------------------------------
stops:   S: Set   C: Clear   R: Remove all                  (Column  1)
```

Figure 10. The Computer Screen After Removing All Tab Set Stops.

c. Press the RIGHT-ARROW key several times to move the cursor to column #6. You can watch the bottom right corner of the screen to determine exactly when the cursor is in column #6

d. Press the "S" key and then compare Figure 11 with the picture you see on the screen.

```
File: LETTER                    MODIFY TAB STOPS      Escape: Review/Add/Change
======|=================================================================
```

```

```

Figure 15. The Computer Screen After Entering The JU Option.

d. Press the ESC key once to exit the print options function. This action returns you to your word processing file.

12. Screen Cues.

a. Press the OPEN-APPLE and the "Z" keys at the same time. The monitor screen will appear like the example provided in Figure 16. This is a handy option because it allows you to look at the screen cues at any time, sometimes helping you to rapidly identify minor problems.

```
File: LETTER                    REVIEW/ADD/CHANGE              Escape: Main Men
======|=================================================================
--------Justified

--------------------------------------------------------------------------
Type entry or use @ commands          Line 2  Column  1        @-? for Help
```

Figure 16. The Monitor Screen Showing The Justified Option.

b. Press the OPEN-APPLE and the "Z" keys at the same time to remove the word, "Justified" at the top of the screen. The file is ready to be used.

13. File Saving. Press the OPEN-APPLE and the "S" keys at the same time to save the file on the data disk in disk drive two or Duodisk drive slot two. Note that when you do this, the red light on the front and over drive or slot #2 comes on. When the light goes out, the file has been saved on the disk.
